### A.1. Current position

Job Title	Profesor Titular de Universidad		
Starting date	2008		
Institution	Universidad Politécnica de Madrid		
Department / Centre	Departamento de Sistemas Informáticos / Escuela Técnica Superior de Ingeniería de Sistemas Informáticos		
Country	Spain	Phone Number	910673628
Keywords	120300 - Computer Sciences		

### A.3. Education

Degree/Master/PhD	University / Country	Year
Doctor en Informática	Universidad Rey Juan Carlos	2004
Licenciado en Informática	Universidad Politécnica de Madrid	1995

### A.4. General quality indicators of scientific production

I have **3 periods of six years of research** recognized by the Spanish Government (3 sexenios de investigación), **2001-2006**, **2007-2012** and **2013-2018**. I also have **1 period of six years of knowledge transfer and innovation** recognized by the Spanish Government (1 sexenio de transferencia), **2010-2017**.

I have 40+ international publications. Among them, **23 publications are indexed in the JCR** (Journal Citation Reports), and the rest of them are almost all highly relevant conferences in their fields. Specifically, I have **17 JCR journals** of the **first or second quartile (Q1/Q2)**. Regarding the international conferences, **9 papers** are **CORE A\*** or **A**.

I have **participated or directed 40+ research projects** (11 European, 5 American, 20 National and 6 Regional).

My **H-index** is **15** with **500+ citations**, according to Google Scholar (<https://scholar.google.es/citations?user=SHmY8yYAAAAJ&hl=es>).

I have directed 3 doctoral thesis.

I have participated as reviewer of international journals and conferences (among them, PODC, ICDCS, Euro-Par and OPODIS). I have participated in the Organizing Committee of several international conferences (among them, ICDCS, DISC, EDCC and OPODIS), and in the Program Committee of multiple international conferences (among them, NCA, ISPA and ExtremeCom).

## Part B. CV SUMMARY

My field of research is fault-tolerance in distributed systems. I have focused my work mainly in Broadcasting, Consensus, Failure Detectors and Distributed Shared Memory. I have obtained interesting results developing new algorithms, implementations and models to solve several gaps found in the literature about these topics, such as broadcast, agreement and leader election where the membership is unknown or the participants are anonymous. I have also gotten results studying the global consistency models where the distributed systems are heterogeneous. I have worked with people of Media Lab-MIT to research in blockchain for swarm of robots.

I have done research stays at top universities: Media Lab-MIT, USA (2017); Beijing Institute of Technology-BIT, China (2012); IRISA/INRIA, France (2006); Georgia Tech, USA (2005).

I have been awarded with 2 PROMETEO grants from Ecuador Government (2014-2015 and 2016-2017) to improve the R&D in the Ecuadorian Universities.

I publish regularly in top journals and conferences of Distributed Computing since 2001. I also participate in research projects regularly since 2001.
